1. INTRODUCTION:

This document contains the resources required for organizing and maintaining the student's clubs & chapters at the school of CS&AI. This compilation of materials and practices includes advice about **recruiting members**, **ideas for activities**, **how to schedule for running meetings** and **achieve milestones** and much more.

Objective: To enable students' participation in the development of the University. Their career, personality, and organizational skills through interactive programs.

Composition: The **Dean of the school of CS&AI** will be the **Chief Patron** and **Faculty coordinator/mentor be the Patron of the Students Club**. Each club will have an Executive Committee and Representatives.

Executive Committee

School of CS&AI student clubs are required to have a **Chair**, **Vice Chair**, **Secretary**, **Treasurer**, **Marketing & PR secretary** and other possible operational roles who are the SoCS&AI students, as well as a **Faculty Sponsor**. The major criteria of Executive Committee will be as follows:

Executive Committee

1. **Chairperson:** 2nd & 3rd Year Students
2. **Vice-Chair:** From 1st to 3rd year Students
3. **Secretary:** From 1st to 3rd year Students
4. **Treasurer:** From 1st to 3rd year Students
5. **Marketing & PR Secretary:** From 1st to 3rd year Students

Operational Committee

6. **Web Master:** From 1st to 3rd year Students
7. **Membership Chair:** From 1st to 3rd year Students
8. **Management Head:** From 1st to 3rd year Students
9. **Content & Creative Head**: From 1st to 3rd year Students
10. **Digital & Social Media Head:** From 1st to 3rd year Students

Please Note that two more additional Positions can be created by the individual Club/Chapter as per the need but no more than **12 members are allowed in the Core Committee** (Executive

Team **Level 1** and Operational Team **Level 2**). On record it must be submitted to the Office once the Committee/Club is formed.

11. Faculty Mentor must be from the School of Computer Science & AI

2. RESPONSIBILITIES OF CLUBS:

Club office bearers are charged with meeting the needs of their members, activities and other responsibilities given by Dean. Clubs are responsible for maintaining the frequency and quality of activity in the area they serve, and for identifying and promoting those activities of specific interest to their members. Each club must communicate with the faculty mentor; submit annual financial and activity reports; report changes in officers and contact information; update club member lists, and management of funds.
This section defined the duties and responsibilities of each club in addition to common responsibilities.

2.1 Duties and Key Responsibilities of The Core Committee of each club/chapter:

1. **Coding Club:**

Faculty Coordinator: Dr. P. Pramod Kumar

1	Target activities to improve problem solving skills of school students
2	Motivate students to improve rank on at any Level of Coding Platform (Beginner, Intermediate & Advanced)
3	Motivate students to participate competitions organize by Coding Club in-campus and off-campus both.
4	Explore other benefits of Multiple Coding Platforms
5	Interaction & Orientation with 1st Year students for membership

2. **IEEE Computer Society:**

Faculty Coordinator: Dr. Mohammad Ali

(Please note that of this Society all the core members must have the active IEEE Student Membership Minimum 12 Membership are required to run it)

1	Explore support IEEE provide and connect international expert from IEEE platform
2	Focus on topics such as product technology, protocols, and standards.
3	IEEE Day Celebration, Vool
4	Increase IEEE membership among students and faculties.
5	Technical Development:: Technical Student Paper Contests, Write articles for Potentials magazine, Robotic/ Design Contests, IEEEXtreme programming challenge
6	Professional Development Professional Activities Workshops, Student Professional Awareness Conference (S-PAC), Student Professional Awareness Venture (S-PAVe).
7	Humanitarian Development Special projects, community awareness activities, get involved with Student Branch activities on campus.

3. **Association for Computing Machinery (ACM) Chapter:**

Faculty coordinator: Dr. Raghvendra Kishore Singh

(Please note that for this Chapter, all the core members must have the active ACM Student Membership Minimum 12-15 Membership are required to run it)

1	ACM student club is suggested to maintain visibility on national and international landscape and maintain high standard in organizing events.
2	ACM student club focus should be towards research topics.
3	ACM student club need to increase their reachability by contacting expert for talk from ACM portal.
4	Administrative Interface —manage your club's member roster, update your club's contact information, and much more
5	Manage ACM Club Web Tools
6	Local Activities Calendar
7	Take advantage of ACM Distinguished Speakers Program
8	UPE/ACM Student Club Scholarship Award
9	ACM Student Club Excellence Awards

4. **Computer Society of India (CSI) Chapter**

Faculty coordinator: Ms. Neelima Gurrapu

Please note that for this Chapter, all the core members must have the active CSI Student Membership to maintain a number of membership.

1	CSI student club is advised to boost up activity.
2	CSI student club is suggested to focus on organizing specialization specific training and workshops.
3	CSI club should consider technology development and needs for India perspective.
4	CSI club should consider events for students' development on social skills.
5	Interaction & Orientation with 1st Year students for membership

5. **Sankhya Club**

Faculty coordinator: Dr. Sandeep (Mathematics)

1	**Organize workshops and seminars:** Invite renowned mathematicians to conduct workshops and seminars on various mathematical topics.
2	Assist students in preparing for exams like GRE, GMAT, or GATE.
3	Advocate for the needs and interests of mathematics students at the university level.
4	Motivate students to engage in research projects related to mathematics.

5	Conduct outreach programs to promote mathematics education in local communities.
6	Inform students about graduate programs and research opportunities in mathematics
7	Partner with other student clubs and organizations to foster interdisciplinary learning.

6. **Student Startup Innovator Club:**

Faculty coordinator: Dr. Dharavat Nagaraju

1	**Ideation and Pitching:** Organize workshops and competitions to encourage students to generate innovative startup ideas and develop compelling pitches.
2	**Mentorship and Guidance:** Connect students with industry experts and mentors who can provide guidance, advice, and support.
3	**Entrepreneurship Training:** Offer workshops and training programs on topics such as business planning, marketing, finance, and legal aspects of startups.
4	**Networking Opportunities:** Facilitate networking events and collaborations with other student organizations, alumni, and industry professionals.
5	**Incubation and Acceleration:** Provide resources and support for student startups to develop their ideas and launch their ventures.

7. **Google Developer Student Club (GDSC)**

Faculty coordinator: Dr. Rajchandar K.

1	Foster a vibrant and inclusive community of tech enthusiasts through events, workshops, and meetups.
2	Provide opportunities for students to learn and develop their technical skills through workshops, hackathons, and mentorship programs.
3	Promote Google technologies and tools within the university community and beyond.
4	Collaborate with other student organizations and industry professionals to create networking opportunities for members.
5	Offer mentorship and guidance to students interested in technology and career development.

8. **IEEE WIE:**

Faculty coordinator: Ms. Faiza Iram

1	**Promote Gender Diversity in Engineering:** Organize events, workshops, and campaigns that raise awareness of gender diversity issues in engineering and encourage women to pursue careers in STEM fields.
2	**Empower and Support Female Engineers:** Provide a supportive network for female engineering students through mentorship programs, career workshops, and peer-to-peer learning opportunities.
3	**Celebrate Achievements and Role Models:** Organize events to celebrate the achievements of women in engineering and highlight inspiring role models for female students.
4	**Bridge the Gap Between Industry and Academia:** Facilitate networking opportunities between female engineering students and industry professionals through events and company visits.
5	**Advocate for Women in Engineering Leadership:** Encourage female engineering students to take on leadership roles within the club and beyond, promoting their voices in the engineering community.

9. Hackathon Student Club:
Faculty coordinator: Mr. Durgunala Ranjith

1	Measure the quantity and quality of hackathons organized by the club, including participation rates, feedback, and impact.
2	Track the number of students involved in club activities, their level of engagement, and satisfaction with the club's events.
3	Assess the growth of students' technical skills, problem-solving abilities, and teamwork through pre- and post-hackathon assessments.
4	Measure the number and quality of partnerships established with industry mentors, sponsors, and organizations.
5	Track the success of students in hackathons, including awards, recognition, and career opportunities.
6	Support and help to other Clubs and Students for conducting Hackathon and Participating in it.

10. Digital Design Media & Branding Club:
Faculty coordinator: Mr. S. Deepan

1	Skill Development: Organize workshops, seminars, and guest lectures on digital media, branding, and marketing. Provide hands-on experience and mentorship opportunities for students.
2	Project Success: Encourage students to work on individual or group projects that apply digital media and branding concepts. Provide feedback, mentorship, and resources to ensure project success.
3	Industry Collaborations: Reach out to industry professionals and organizations for guest lectures, workshops, and internship opportunities. Facilitate networking events and collaborations.
4	Student Engagement: Organize regular club meetings, events, and competitions to foster a sense of community and engagement. Promote active participation and leadership opportunities.
5	Career Outcomes: Track student placements, internships, and entrepreneurial ventures related to digital media and branding. Provide career counselling and guidance to help students achieve their goals.

11. Cloud Computing & DevOps Student Club
Faculty coordinator: Mr. Sharan Bediga

1	**Organize workshops and training sessions** on cloud platforms (AWS, Azure, GCP), DevOps tools (Git, Jenkins, Docker), and relevant programming languages (Python, Java).
2	**Collaborate with industry professionals** for guest lectures, mentorship programs, and internship opportunities.
3	**Host hackathons and coding competitions** to challenge students and showcase their skills.

4	**Facilitate networking events** to connect students with industry professionals and other like-minded individuals.
5	**Provide career guidance and mentorship** to help students achieve their career goals in cloud computing and DevOps.

12. Data Science Club
Faculty coordinator: Dr. Arpita Baronia

1	**Skill Development:** Organize workshops, seminars, and hackathons to enhance students' data science skills, including data cleaning, analysis, visualization, and machine learning.
2	**Industry Collaboration:** Collaborate with industry professionals and organizations to provide guest lectures, mentorship opportunities, and real-world projects.
3	**Project-Based Learning:** Encourage students to work on data science projects individually or in teams to apply their knowledge and gain practical experience.
4	**Community Engagement:** Organize data science competitions, meetups, and events to foster a sense of community and networking opportunities.
5	**Career Development:** Provide career guidance, mentorship, and workshops on resume building, interviewing, and networking.

13. AIML Club
Faculty coordinator: Dr. ELN Kiran Kumar

1	Skill Development: Organize workshops, seminars, and hackathons to introduce students to AI and ML concepts, tools, and techniques. Provide hands-on experience and mentorship opportunities.
2	Industry Collaboration: Collaborate with industry professionals and organizations to provide guest lectures, mentorship programs, and real-world projects.
3	Project-Based Learning: Encourage students to work on individual or group projects that apply AI and ML concepts. Provide feedback, mentorship, and resources to ensure project success.
4	Community Engagement: Organize AI and ML meetups, conferences, and events to foster a sense of community and networking opportunities.
5	Career Development: Provide career guidance, mentorship, and workshops on resume building, interviewing, and networking for students interested in AI and ML careers.

14. Cyber Security Club
Faculty coordinator: Dr. T. Sampath Kumar

1	**Skill Development:** Organize workshops, seminars, and hackathons to introduce students to various cybersecurity concepts, tools, and techniques. Provide hands-on experience and mentorship opportunities.
2	**Industry Collaboration:** Collaborate with cybersecurity professionals and organizations to provide guest lectures, mentorship programs, and real-world projects.
3	**Capture the Flag (CTF) Competitions:** Organize or participate in CTF competitions to challenge students and enhance their problem-solving and ethical hacking skills.
4	**Community Engagement:** Raise awareness about cybersecurity threats and best practices through workshops, talks, and social media campaigns.
5	**Career Development:** Provide career guidance, mentorship, and workshops on resume building, interviewing, and networking for students interested in cybersecurity careers.

15. Gaming and ARVR Club
Faculty coordinator: Dr. A. Vamshi

1	**Skill Development:** Organize workshops, seminars, and game jams to enhance students' skills in game development, AR/VR design, and programming. Provide hands-on experience and mentorship opportunities.
2	**Industry Collaboration:** Collaborate with gaming studios, AR/VR companies, and industry professionals to provide guest lectures, mentorship programs, and networking opportunities.
3	**Game Development Projects:** Encourage students to work on individual or group game development projects, providing guidance and resources throughout the process.
4	**Community Engagement:** Organize gaming events, tournaments, and meetups to foster a sense of community and networking among students.
5	**Career Development:** Provide career guidance, mentorship, and workshops on resume building, interviewing, and networking for students interested in the gaming and AR/VR industry.

16. International Student Affairs Network Student Club
Faculty coordinator: Dr. Santosh Kumar Henge

1	**Cultural Exchange:** Organize cultural events, workshops, and language exchanges to promote understanding and appreciation of different cultures.
2	**Global Networking:** Facilitate networking opportunities between international students and local students, as well as with professionals and organizations in the community.
3	**Academic Support:** Provide academic support services, such as tutoring, language assistance, and guidance on navigating the academic system.
4	**Social Integration:** Organize social events and activities to help international students integrate into the local community and make friends.
5	**Advocacy and Representation:** Advocate for the needs and interests of international students at the university level, working with administration and faculty to ensure a positive and inclusive experience.

17. Azure Developer Student Community
Faculty coordinator: Dr. Vijaya Chandra Jadala

1	**Skill Development:** Organize workshops, hackathons, and mentorship programs to help students learn and develop their skills in Azure cloud technologies, **including Azure Copilot**. Provide hands-on experience and mentorship opportunities.
2	**Industry Collaboration:** Partner with Microsoft and other industry leaders to provide guest lectures, mentorship programs, and real-world project collaborations. **Leverage Azure Copilot to enhance project development and productivity.**
3	**Community Engagement:** Foster a sense of community among Azure developers by organizing meetups, networking events, and online forums. **Utilize Azure Copilot to facilitate collaboration and knowledge sharing among community members.**

4	**Project Development:** Encourage students to work on individual or group projects using Azure technologies, **including Azure Copilot**. Provide guidance, resources, and mentorship to support project development.
5	**Career Development:** Provide career guidance, mentorship, and workshops on resume building, interviewing, and networking for students interested in cloud computing careers. **Highlight the value of Azure Copilot skills in the job market.**

18. GitHub Student Community

Faculty coordinator: Mr. K. Kiran

1	**Skill Development:** Organize workshops, seminars, and hackathons to introduce students to GitHub features, best practices, and collaboration tools. Provide hands-on experience and mentorship opportunities.
2	**Open-Source Projects:** Encourage students to contribute to open-source projects on GitHub, gaining valuable experience and showcasing their skills.
3	**Community Engagement:** Foster a sense of community among GitHub users through meetups, online forums, and collaboration on projects.
4	**Mentorship and Guidance:** Offer mentorship programs and career guidance to help students leverage GitHub for professional development and job opportunities.
5	**Collaboration and Networking:** Facilitate collaborations between students, faculty, and industry professionals through GitHub-based projects and events.

2.2 Addition responsibilities:

Apart from above mentioned responsibilities each club is required to follow below mentioned tasks:

- It is advisable to all clubs to show online presence on various social media handles.
- All the clubs need to submit event information like Event name, summary, date, time, venue, list of attendees, winners, organizers, pictures etc. to Office for record within 7 days of event date.
- To recognize contribution by student members of each club, School of CS&AI will organize an event to distribute certificated of recognition to student member of executive committee of all clubs.
- It is decided to have separate page for each club on school of CS&AI webpage at SR University web site. If already exists, then regularly update the page with recent information.

- Suggesting the administration to improve the student amenities to improve their career and personality.
- Helping the administration in smooth conduct of student activities on the campus.
- Guiding the students to improve their technical, organizational, and managerial skills by organizing seminars / symposia / workshops etc.
- Encouraging innovative and creative skills of the students.
- Activities to improve the knowledge and skills of the students.
- Arrange expert lectures from eminent persons in the society for career and personality development.
- Club focusing on programming and coding will take one lab of competitive programming course.

3. RESPONSIBILITIES OF CLUB OFFICERS

Each club will have a core committee, which includes elected club officers, the past Chairperson. The club's core committee is generally responsible for managing the club's affairs (except for electing officers and amending bylaws).

It is essential for the core committee to be open to the suggestions and feedback of the club membership and should always be open to offers of help.

Upon assuming the office, all core committee members should contact the faculty mentor to introduce him/herself, review club bylaws and policies and procedures, and review the events of the past year with his/her predecessors.

The Club Chair

The Chair is the principal officer and is responsible for leading the Club and managing its activities in accordance with the policies and procedures of School.

The club Chairperson has the overall responsibility for developing club programs, for ensuring that plans and assignments are carried out, and for seeing that the club fulfils its obligations to the Association.

The Chairperson should be familiar with the policies and procedures of the club, with the club's bylaws, and with the duties of all the other club officers and committee members.

The newly elected Chairperson should schedule an executive committee meeting which includes the outgoing officers as well. At that time, the Chairperson required to schedule executive council meetings for the entire year. Keep in mind the advantages of scheduling the meeting at the same time each month. Before getting too far along in the club's year, the Chairperson should do the following: appoint or establish nominating committee according to bylaws for next year's elections; communicate activities of the club to the faculty mentor; set audit procedures in motion at year end for financial records turnover; and plan a budget with the club Treasurer, to be reviewed and approved by the entire core committee.

One of the most important duties of the club Chairperson is finding enthusiastic and qualified members to serve as executive committee members. The Chairperson should strive to bring new students from first year into the committee structure to provide training for future club leaders.

It is strongly recommended that the club chairperson take the time at general meetings to acknowledge those club volunteers whose help has been valuable. This positive feedback and public recognition of good works is often just the encouragement an active volunteer needs to commit to a longer-term leadership position in the club in future years.

The Club Vice Chair

The club Vice Chairperson should be prepared to assume the office of Chairperson or temporarily act in that position at any time, assist the Chair in the management of the Club, and perform other duties that may be assigned by the Chair. The Vice Chairperson should be familiar with the duties and responsibilities of the Chairperson, and of the other elected officers and committee chairpersons.

The Vice Chairperson can be an integral component of the club's operation. In most cases, the Vice Chairperson is responsible for overseeing the activities and progress of the various committee and club programs.

The Club Treasurer

The club's financial management and operation are of great importance to the club. The club Treasurer is responsible for the fiscal operation and reporting of the club, and of all committees and programs established by the club.

The ongoing responsibilities of the club treasurer include:

1. Maintaining all club financial records.

2. Filing mandatory annual financial report with School.

3. Reporting financial status and requirements to club.

4. Contacting sponsors for financial aid in different event organized by the club.

The Club Secretary

The ongoing responsibilities of the Club Secretary include:

1. Informing faculty mentor of the names and contact information of new officers and providing School with updated membership lists.

2. Sending agenda to committee members for executive meetings and recording the minutes of such meetings.

3. Handling all club correspondence on a timely basis.

4. Maintaining club files for historical purposes.

The Club Marketing & PR Secretary

The role of a Student Club Marketing & PR Secretary typically involves managing the club's public relations, marketing strategies, and communication efforts. This person is responsible for promoting the club's activities, events, and brand, ensuring that the club maintains a positive image both within the school and in the wider community.

Specific duties might include:

Social Media Management: Overseeing the club's social media accounts, posting updates, and engaging with followers.

Event Promotion: Creating and distributing promotional materials for events, such as posters, flyers, and online content.

Communication: Drafting and sending newsletters or emails to club members and other stakeholders.

Brand Management: Ensuring that all promotional materials are consistent with the club's branding guidelines.

Public Relations: Managing the club's relationships with other organizations, sponsors, and the media.

The Faculty Mentor

The Mentor shall be a faculty member of school. Each Student Club has one Mentor. The faculty mentor shall be generally responsible for the activities of the Club. Specifically,

1. The Mentor helps provide continuity from year to year as student leadership and personnel change.
2. Promotes good student-faculty relationships.
3. Helps maintain University/School standards in all activities of the Club.
4. Exercises financial supervision, if necessary, by promoting prompt payment of bills and collection of dues and overseeing the settlement of all accounts in the event of dissolution of the Club.

4. IDEAS FOR CLUB ACTIVITIES

The kinds of activities a club can undertake are endless, depending on the creativity and interest of each group. But here are a few examples of activities that may be of interest to particular club:

Distinguished Speakers Program/Lectures: Invite one of the Distinguished Speakers to speak with your club on a topic of your choice. Plan the event with other local organizations and publicize it well to recruit a big audience or even new club members.

Panel Discussions and Roundtables: Invite three or four people from the technology workforce or organize the event with members from your club. This will encourage discussions and exchange of ideas and opinions.

Joint Meetings: Joint meetings are a great way to interact with local professionals. They are also an opportunity for Professional Clubs to meet with local Student Clubs to teach and advise.

Mixers/Social Events: Host an event, dinner, or dessert party where the main purpose is to meet and greet. Encourage others to interact and exchange thoughts and ideas. For a change of pace, these events can be hosted at bowling alleys, bars, restaurants or at a park on a nice day.

Sports Teams: Enlist your club in a local sporting league. This will promote unity and bonding amongst club members, as well as encourage friendly competition!

Holiday Parties: Celebrate the holidays together with food, drinks, games and prizes! A great chance to get to know all the members and officers better.

How-to Presentations: Have an expert in a specific field demonstrate and teach. How-to's can range from anything including "How to fix a resume" to "How to use Photoshop," and more. The sky is the limit!

Fundraising: Fundraising is a great way to earn money for your club to help with winner reward, promotional activities etc.

Conferences/ Workshops: Sponsor or co-sponsor a conference/workshop with a local non-profit organization. A conference/workshop is an excellent platform for researchers in all current areas of information technology to present their latest research findings, as well as an open forum for networking and exchanging of ideas.

Networking: Interact with other people to exchange information and develop contacts.

Seminars: Seminars bring together small groups for recurring meetings, focusing each time on some particular subject, in which everyone present is requested to actively participate. This is often accomplished through an ongoing dialogue with a seminar leader or instructor, or through a more formal presentation of research. They are essentially a place where assigned readings are discussed, questions can be raised and debates can be conducted. They are relatively informal.

High School Students Shadowing College Students: Pair high school students with college students. The undergraduate should invite the high school student to spend the day with him or her, attending classes and eating meals together. (High school vacation days work well.)

College Students Shadowing Professionals: Pair college students with professionals in the students' desired career field. A student can spend the day with the professional at his/her place of work.

Club Posters: Gather a group of students to make posters advertising all of the schoolevents. Alternately, students may create posters advertising course offerings for the upcoming semester, focusing on the fact that just one computer science course can be beneficial regardless of the person's major.

Poster Session: Organize a small poster session for students who have conducted summer research and participated in internships.

Banquet/Award Ceremonies: Reward academically outstanding students by recognizing them at an end-of-semester banquet. Rewards can include gift cards for local restaurants or stores, plaques, or certificates. Be sure to include at least one "most improved" award.

Mentoring: Pair younger students with older students based on similar interests and hobbies. Make sure that someone in the group is made explicitly responsible for driving group activities, so momentum begins early and keeps going.

Tutoring: If at all possible, find funding for departmental tutors. (In extreme cases, where no funding can be secured, ask student volunteers to tutor their peers in specific classes.) Tutors can sign up for time slots; the information can be emailed to majors; and students can meet the tutors in the computer labs or in special reserved rooms. Alternatively, your club may want to organize volunteers to tutor local high school students, using a location on the high school campus.

Make a Website: Make a website for your club. Include upcoming activities, pictures and descriptions of recent events, and biographies of successful people in a wide variety of interesting computing-related careers.

Study Sessions: For classes, have students from the same classes can meet the night before a test to review the material and ask questions. For GRE or graduate school preparation, ask faculty members

to hold a study session for students interested in taking the GRE. Afterwards, encourage students to review each subject area (such as computer networks) as a group, using at least two sessions where all students prepare for the first meeting using notes and textbooks from previous classes. Individual members of the group prepare presentations that address unanswered questions in a second meeting. Allowing the students to ask experienced faculty members questions about the Exams will calm nerves and kick off the test preparation phase. "Dividing and conquering" further preparation keeps the group on task and lends efficiency to the process.

"Take Apart Your Computer" Day: Faculty members help students explore the inside of a computer. Alternately, student volunteers take computers apart with younger students, such as students from local high schools.

Research: Encourage fellow students to submit their research to current Student Research Competition at conferences throughout the year. Another option is to select several seniors from the capstone course (Senior Project, Senior Seminar, etc.) for a program where the seniors give advice to younger people. Some or all of them can demonstrate their work for the younger students.

Meet the Grads Night: Invite recent graduates to talk to current students in the computer science department. The graduates should be a mix of people who went to graduate school and people who started their careers right after graduation.

Bulletin Boards: Gather a group of students to make announcement boards to be placed in public areas, advertising events in the computer science department, career possibilities, research posters, pictures of local award winners and people in-the-news, tutoring opportunities, grants scholarships, other club meetings, etc.. Popular places to post would be restrooms, inside classrooms, and in dorms. Consider fun pictures of officers, blown up to poster size. This also helps to dispel stereotypes.

Buddy System: At the beginning of each semester, hold a meeting where people can gather and meet the other people in their classes. The students can then pair up with each other (or form small groups) and set up times to meet outside the classroom throughout the semester, so that the class goes more smoothly for each.

Communication Workshop: Find an expert in communication who is willing to volunteer time. Many schools or offices specialize in providing teaching and training for campus groups and departments. Frame the workshop as a general-audience event: How everyone can improve communication practices.

Lab Welcoming: The uninviting and unfamiliar COMPUTER SCIENCE laboratory environment can be daunting to people. Gather several older students and invite the laboratory assistants and any other student assistants in the department to a discussion session, providing information that will sensitize the students. The lab assistants should be sure to circulate among the students, be friendly, stop to ask how students who don't request help are doing, and not wait for students to summon a tutor.

Interdisciplinary Activities: Invite students who are double-majoring or otherwise pursuing interdisciplinary paths, along with faculty members who perform interdisciplinary research to speak about projects. Examples include digital art, artificial life, mathematical simulation, etc. Profile current tutors, during a club meeting, encouraging the students to discuss the benefits/advantages of their work.

Book Club: Invite students to participate in a monthly book club meeting, where they are free to discuss any interesting novels, but are encouraged to read computer science related books.

Oral Histories: People have valuable stories to share with succeeding "generations" of students. Have people tape each other and edit the footage into stories. Ask each pair to describe how each member chose computing as a major, what struggles s/he has had and how s/he overcame adversity, and her future plans.

Brain Games: Send out campus flyers from the club. The flyers should be filled with brain games and puzzles that exercise one's problem solving skills. Be sure to include a line that says "If you like these brain games"

Visit High Schools: Ask for student volunteers to visit local high schools to educate younger students about the field of computer science and its benefits. Call high schools to find out times and dates for college/career fairs or other counseling events. Offer to attend the event and represent computer science.

Programming Contests: As a club event you may choose to hold a programming contest for introductory students only, with questions supplied by local professors. Invite advanced students to prepare for and to attend programming contests hosted by professional organizations.

Showcase: Organize a short-series of workshops that happen every week or two, where faculty members (and perhaps PhD students) provide short, engaging presentations on their research, aimed at undeclared, exploring undergraduates.

Open House: Hold an information session close to registration time for prospective students. Invite current computer science majors as well as professors in the department to mingle with possible future computer science majors. Offer the prospective students tours of the department and its spaces.

Graduate School Applications: Faculty members, professionals, or graduate students give tips and advice to undergraduates who are filling out applications for graduate, professional school, assistantships, fellowships; writing personal statements and interviewing. Resume Building: This meeting is to help club members build a resume for potential internships. The workshop will organize group activities such as ice breakers and public speakings to prepare for interviews.

Workshops: Hold periodic workshops for people in the community. Students can help citizens with any computer problems they may be having, or simply teach them to set up and use an email account. Additionally, students may help the unemployed or under-employed construct resumes and learn basic technology skills.

Mock Interviews: Have professors or professionals from area businesses volunteer to participate in mock interviews for students contemplating graduate school or entering the work world.

Panel Discussions and Roundtables: Invite three or four people from the technology workforce to speak with students about their careers and lives outside work.

Database of Interview Questions: Construct a database of interview questions and add to the database as each year's group of seniors interviews. The database may also include general tips and advice for interviews.

Database of Research Opportunities: Compose a database which contains information about different research opportunities available to undergraduates.

Database of Scholarships and Grants: Build a database of scholarship opportunities for people in computing. Encourage people to provide the names and contact information for scholarships they have applied for or received.

Database of Internships: Have students submit reviews of their internships — location, specifics of the job, feedback, etc. —or keep on record places that are accepting students for internships.

High School Computer Science Demonstrations: Ask student volunteers to travel to local high schools to give computer science demonstrations for the younger students. Suggestions for presentations include robotics, basic game programming with graphics, and website design.

Achievement Parties: Celebrate when students or faculty members in the department gain special recognition. Examples include job offers, graduate school acceptance or receipt of an award of special significance.

Club Activities Movie Night: People spend a simple, relaxing night with other people in the computer science department, watching movies and eating popcorn. Recognize scenes where errors demonstrate that the producer had no computing consultant present or ask students to silently record the errors and award a prize for the "best set of errors". Movie night provides an opportunity for socializing and a break from studying.

Meet the Faculty: Set up a luncheon date at the beginning of each school year and invite students and faculty to meet and socialize. Organize "how to succeed in computer science" discussions at these kinds of socials.

5. MILESTONE GUIDELINES

Progress milestones	Requirements
August & September 2024	• Established club and election of office bearer by chair • Monthly office bearer meeting • Semester long plan • Monthly event
October 2024	• Monthly office bearer meeting • Monthly event
November 2024	• Monthly office bearer meeting • Semester Major event
December 2024	• Monthly office bearer meeting • Monthly event • Office bearer duty evaluation • Semester record submission
January 2025	• Monthly office bearer meeting • Monthly event
February 2025	• Monthly office bearer meeting • Monthly event
March 2025	• Monthly office bearer meeting • Monthly event
April 2025	• Monthly office bearer meeting • Semester Major event
May 2025	• Monthly office bearer meeting • Monthly event
June 2025	• Monthly office bearer meeting • Monthly event • Annual record submission

Issuing Certificates

If you require to provide a certificate after hosting an event. In order to issue a certificate, we need the following information:

1. Date of Event
2. Name of Event
3. Name of club who will be the certificate holder
4. Location of event, including address
5. Type of event
6. Summary of the event
6. Name and contact details, affiliation of participants
7. Number of volunteers
8. Contact info to email certificate (name, fax, email)

Please submit this information to respective Club Faculty Mentor and Office at most one week of the event.

Club Outreach and Communication

Social media is a great way to stay in touch with club members and potential members. All clubs are encouraged to create and maintain LinkedIn, Instagram, Facebook pages and Twitter accounts for their clubs. Create informative and interactive posts, announce upcoming meetings, connect with other clubs in the area and show the community what makes your club special.

Financial Responsibilities and Requirements

The following is a summary of financial responsibilities:

1. Any club that collects, holds or disburses funds must submit an annual accounting of such funds.

2. Disbursements of funds for expenditures necessary for the normal operation of the club require approval from faculty mentor. Any club desiring to disburse funds beyond those necessary for normal operations must obtain advance approval of the Dean, SOCS&AI.

6. RECRUITMENT PROCESS

Benefits of participating:

Students should consider this an extracurricular activity because it helps to build character, leadership, decision making, organization skills, and responsibility.

Procedure

All the student office bearers are the nominated posts. This nomination is purely based on the merit of their leadership activities exhibited during the previous years. The Chairperson will be nominated by the Dean in consultation with the faculty coordinator. Other members of the core committee are nominated by Chairperson of the club respectively. Appropriate gender balance in each club shall be given priority.

Who Can Participate?

The SOCS&AI Student Clubs will consist of students in core committee. Members must complete an application and meet the eligibility requirements. We are looking for some dynamic, enthusiastic, and committed students to lead the Student Clubs for this year. Qualities necessary for any member on core committee are:
